SUMMARY

I am a UI/UX designer focused on creating intuitive, user-centered digital products. I work across the full design process – from research and wireframing to visual design and usability testing. I aim to build solutions that are not only visually appealing, but also solve real user problems and support business goals. My experience covers UX research, wireframing, responsive web and mobile design, usability testing, and design systems.

HARD SKILLS

UX/UI Design (Web and Mobile) • Wireframing • Landing Page • Typography • Figma • Adobe Photoshop • Auto Layout • UI Kits • Components

LANGUAGES

English – pre-intermediate • Spanish – pre-intermediate • Ukrainian – native

PROJECT EXPERIENCE

Website Redesign Project
https://www.behance.net/gallery/244108005/Barbershop-Website-Redesign
Goal: To redesign an existing website and improve its usability, structure, and visual clarity.
Tools: Figma

What was done:
Created low- and mid-fidelity wireframes, layout and user flow. Designed a responsive landing page focused on clear content. Built reusable UI components and a structured UI Kit. Applied Auto Layout to ensure scalability and consistency.

Mobile Photography Courses Landing Page Design
https://www.figma.com/design/coXdgQujffsqqoVGcRwvqD/Untitled?node-id=1-12&t=c0k0II7tJxb33HCq-1
Tools & Methods: Figma (wireframing, UI design, Auto Layout, UI Kit) • User flow & information architecture • Low- and mid-fidelity wireframes • Responsive design principles

What was done:
Structured content to clearly communicate course value and benefits. Designed a conversion-oriented landing page with intuitive user flow. Created wireframes and responsive UI using reusable components and Auto Layout.
